#### Teaching methods

Lectures, practices, consultations and seminar paper (study research paper). Through practices students will master the methodology of making basic research of defined rural area and local, national and international environment for sustainable socio-economic development of selected local rural communities, and then through study work give their suggestions and solutions for local sustainable development through the development of strategies and programs for sustainable development.

#### Knowledge evaluation (maximum number of points is 100)

Pre-exam obligations	points	Final exam	points
Activity during classes	10	Written exam	15
Practical classes	20	Oral exam	15
Study research paper	40
